Professional Summary

Talented product designer with 3 years of hands-on experience designing user-centric digital products, including mobile apps and web platforms. Strong background in UI/UX design, wire-framing, and prototyping using tools like Figma, Farmer, Rive and Adobe XD. Combines a foundation in Telecommunication Engineering with a creative, problem-solving mindset and a focus on usability, accessibility, and design systems.

Core Skills

- Social Media Content Design (Instagram, TikTok, Ads, Reels)
- Motion Graphics & Video Editing (After Effects, Premiere Pro, CapCut)
- Product Design (UI & UX Design)
- User Research
- Adobe Photoshop, Illustrator
- Canva & CapCut (Advanced)
- Typography, Color Theory & Layout Systems
- Fast-turnaround Execution & Creative Problem Solving
- Template Systems & Organized Asset Libraries

Professional Experience

Product Designer, Psychology Hub, NAPS, Nov 2024 — May 2025

- Faced with translating 50+ complex feature requirements into actionable designs, I collaborated with the Product Owner to write detailed user stories and acceptance criteria - streamlining development hand-offs and reducing ambiguity in sprint planning.
- Charged with ensuring a user-centric experience, I led user research, persona creation, and end-to-end journey mapping before producing low- and high-fidelity Figma prototypes - validating layouts via stakeholder walk throughs and usability feedback to optimize task flows
- Tasked with maintaining design consistency at scale, I built and documented a component-based design system (grid, typography, color palette, UI elements) and partnered with developers through Agile sprints to QA-test implementations - ensuring pixel-perfect, accessible UI's across web and mobile.

Lead Designer, 10.8.8 Africa, Nigeria, Jun 2021 - Present

- Directed a cross-functional design team using Figma to produce four campus magazine editions, resulting in 12,000+ downloads from readers within and outside FUTMinna.
- Designed and Launched a responsive promotional landing page for the "Purpival" carnival, targeting 8 Universities across Minna, Niger State, and increasing event visibility and ticket engagement.
- Established consistent brand standards and collaborated with developers, writers, and media

teams to maintain a visual identity across digital publications and events.

- *Led Redesign of 10.8.8 website boosting lead generation and visits by 45%*

Product Designer, Spark Deliveries, 2024

- *Faced with low trust and fulfillment issues, I led user research using screener surveys and Whats App interviews to uncover core pain points, then translated the findings into actionable personas and user flows for features like real-time tracking and multi-stop delivery.*
- *Tasked with creating a scalable visual system for the delivery app, I developed a 4-point grid visual design system (covering typography, color palette, and reusable components) and applied it to build 47 high-fidelity, responsive app screens using Figma .*
- *To refine core features and improve usability, I conducted a competitive analysis of GIG Go, DHL, and Uber identified key feature gaps, iterated on prototypes through usability testing and prototypes through usability testing.*

Education

Bachelor of Engineering in Telecommunication Engineering, Federal University of Technology, Minna, Nigeria, 2024

Certification

Certificate of completion for the [I4G x Zuri Cohort 2 Scholarship Program](#) (Product design Track)

Technical Skills

Figma, Framer, Rive, Adobe Photoshop, Illustrator, InDesign, After Effects, Premiere Pro, Final Cut Pro, Canva, CapCut, Audio Editing.
